-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-4 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 and 2 "the container" lacks antecedent basis. In claim 1 "the fibres being needled" is unclear.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uhlenbrock (6,858,051). Uhlenbrock shows a filter unit 7 connected with an inlet 2 from the crankcase, which delivers clean air at its outlet 3 to the inlet manifold, and the separated particles being led back to the crankcase at outlet 4, the filter unit 7 comprising a cylinder of a fibrous nature, the contaminated air having to pass through this cylinder. See Figures 1 and 2, column 2, lines 18-21, and column 3, first full paragraph.

Uhlenbrock shows everything except the fibers of the filter being needled and the fibers having a diameter in the range of 1 to 40 micrometers. It would have been obvious to one having ordinary skill to utilize needling as the means of bonding the

fibers together, since the device would function in the same way regardless of whether or not the fibers were needled, and to utilize a fiber diameter of 1 to 40 micrometers, since it has been held that selecting an appropriate size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ (CCPA 1955).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
